SUBJECT INDEX

Acetylcholine metabolism in the guinea pig ileum, the actions of tacrine and amiphenazole on (De la Lande and Porter), 149.

Adenosine deaminase activity in lymphoid cells during antibody production (Hall), 93.

Alcohol levels, the effect of traumatic shock on experimental blood ethyl, in mice (Lykke, Robertson and Kosche), 275.

Alderlin, (nethalide), a new beta adrenergic blocking agent, the effects of, upon the general and coronary haemodynamics of the intact animal (Maxwell, Robertson and Elliott), 511.

Alkaloids of *Lupinus digitatus* Forsk., examination of the, for hepatotoxic effects in the rat (Peterson), 123.

Amiphenazole and tacrine, the actions of, on acetylcholine metabolism in the guinea pig ileum (De la Lande and Porter), 149.

Angiotensin II, the reduction of the pressor action of, in sodium-deficient conscious sheep (Blair-West, Coghlan, Denton, Goding, Munro and Wright), 369.

Antibody in the renal tubules and urine of mice (Faine), 81.

Antibody production, adenosine deaminase activity in lymphoid cells during (Hall), 93.

Antibody production in the chick embryo, adoptive transfer of.
1. The inoculation of stimulated spleen cells from adult fowls on to the chorio-allantoic membrane of outbred and inbred embryos (Lind and Ernyei), 661.

Arboviruses, the formation of plaques in tissue culture by (Miles and Austin), 199.

Arylsulphatases and related enzymes in the livers of some lower vertebrates (Roy), 331.

Autoantibodies produced against mouse erythrocytes in NZB mice (Long, Holmes and Burnet), 315.

Bile salts, the effect of, on contraction of visceral smooth muscle (Laurence and Simmonds), 343.

Bilirubin, cerebrospinal fluid and icterus of the rabbit brain (Watson and Szego), 505.

Blood coagulation, egg yolk phospholipids including phosphatidic acids in (Fantl and Ward), 561.

Blood glucose, the micro-determination of (Watson and Stevenson), 211.

Blood pressure and body build of men in Australia and New Guinea (Whyte), 395.

Body build and blood pressure of men in Australia and New Guinea (Whyte), 395.

Cation transport, studies of the mechanism of.
1. The preparation and properties of a cation stimulated adenosine-triphosphatase from guineapig kidney cortex (Charnock and Post), 547.

Cation transport, studies of the mechanism of.
2. A phosphorylated intermediate in the cation stimulated enzymic hydrolysis of adenosine triphosphate (Charnock, Rosenthal and Post), 675.

Cholesterol esterase activity of rabbit macrophages, the effect of lecithin on (Day and Gould-Hurst), 323.

Colicin F activity, preparation of a substance having, from *Escherichia coli* C.A. 42 (Reeves), 163.

Croton oil stimulation, the localisation of the influence of, on tumour initiation by urethane in mice (Pound), 73.

Cytotoxicity using P^{32}, studies of (Forbes), 255.

Ectromelia virus infection, cell changes in (De Burgh), 457.

Encephalitis virus, Murray Valley, a plaque assay method for (Austin), 205.

Erythrocytes exposed to naphthoquinones, adaptive mechanisms in (Harley and Robin), 281.

Escherichia coli C.A. 42, preparation of a substance having colicin F activity from (Reeves), 163.

Excretion, water and electrolyte, by the sheep, the effect of vasopressin on (Cross, Thornton and Tweddell), 629.

Eye, skin and hair, colours, the distribution of, in an Australian population (Keogh and Read), 405.

Formiminoglutamic and urocanic acid excretion (Davis and Kelly), 499.

Freeze-drying assembly for laboratory use, a (Annear), 571.

Glucose metabolism of the avian egg (van Deth), 129.

Hair, skin and eye colours, the distribution of, in an Australian population (Keogh and Read), 405.

Icterus of the rabbit brain, cerebrospinal fluid bilirubin and (Watson and Szego), 505.

Immune response, autoradiographic studies of the.
3. Differential lymphopoiesis in various organs (Mitchell, McDonald and Nossal), 411.
4. Single cell studies on the primary response (Nossal, Mitchell and McDonald), 423.

Interstitial cells in the testis of the Australian phalanger (*Trichosurus vulpecula*) (Green), 99.

Iron in ruminant nutrition.
1. Liver storage iron, plasma iron and total iron-binding capacity levels in normal adult sheep and cattle (Underwood and Morgan), 247.

Iron, the distribution of, following parenteral injection or oral ingestion (Walsh, Cantrill and Sanford), 385.

2 - Isopropyl - amino - 1 - (2 naphthyl) ethanol hydrochloride, *see* Alderlin.

Kinins, studies on plasma.
1. The composition of kininogen complex (Margolis and Bishop), 293.
2. Some properties of the kinin-destroying enzyme (Bishop and Margolis), 307.

Lecithin, the effect of, on cholesterol esterase activity of rabbit macrophages (Day and Gould-Hurst), 323.

Leucocytes, the adhesion of, to vascular endothelium (McGovern and Bloomfield), 141.

Leucocytic emigration and vascular permeability in rat skin, an electron microscopic study of (Hurley), 171.

Lipoid deposition in aorta cells, application of a tissue culture technique to screen compounds for the prevention of (Curtis and Galvin), 687.

Lymphopoiesis, the pattern of, in the mouse thymus after cortisone administration or adrenalectomy (Ishidate and Metcalf), 637.

Macrophages, mouse peritoneal, factors involved in the adherence of S. *typhimurium* C5 and (Auzins and Rowley), 539.

Macrophages of normal rats, *in vitro* phagocytic and bactericidal ability of alveolar and peritoneal (Pavillard), 265.

Measles, vaccination against (Enders), 467.

Membrane resistance and capacitance in the sartorius muscle of the toad (*Bufo marinus*), microelectrode measurements of (Pugsley), 615.

Metabolism, glucose, *see* Glucose metabolism.

Microelectrode measurements of membrane resistance and capacitance in the sartorius muscle of the toad (*Bufo marinus*) (Pugsley), 615.

Murray Valley encephalitis virus, a plaque assay method for (Austin), 205.

Naphthoquinones, adaptive mechanisms in erythrocytes exposed to (Harley and Robin), 281.

Nethalide, *see* Alderlin.

Nutrition, iron in ruminant, *see* Iron in ruminant nutrition.

Ocular reflex in the dogfish *Squalus acanthias* L., an undescribed unilateral (Bell and Satchell), 221.

Opsonins in pig serum and their purification (Turner and Rowley), 595.

Oxygen breathing, high pressure, in rats, pulmonary damage due to, *see under* Pulmonary damage.

Pantothenic acid and vitamin B_{12} in the liver of sheep (Dawbarn, Forsyth and Kilpatrick), 1.

Papilloma, rabbit, studies on the virus of, *see under* Virus of rabbit papilloma.

1, 10-Phenanthrolines, actions of metal chelates of substituted, on viruses and cells.
1. Inactivation of viruses (White, Harris, Dwyer and Shulman), 517.
2. Inhibition of viral multiplication (White, Harris and Shulman), 527.

Phospholipids, egg yolk, including phosphatidic acids in blood coagulation (Fantl and Ward), 561.

Plasma kinins, *see* Kinins, plasma.

Platelets, human, the labelling of, with radiochromate (Davey and Lander), 581.

Pulmonary damage due to high pressure oxygen breathing in rats.
4. Quantitative analysis of sulphydryl and disulphide groups in rat lungs (Jamieson, Ladner and van den Brenk), 491.

Radiochromate, the labelling of human platelets with (Davey and Lander), 581.

Renal tubules and urine of mice, antibody in the (Faine), 81.

Reovirus type 3 infection in laboratory mice (Cook), 651.

S. typhimurium C5 and mouse peritoneal macrophages, factors involved in the adherence of (Auzins and Rowley), 539.

Salmonella typhimurium, virulence of, for mice, genetic and immunologic observations on the (Krishnapillai, Reeves and Rowley), 61.

Shock, traumatic, the effect of, on experimental blood ethyl alcohol levels in mice (Lykke, Robertson and Kosche), 275.

Skin, hair and eye colours, the distribution of, in an Australian population (Keogh and Read), 405.

Spleen graft growth in splenectomised mice (Metcalf), 51.

Splenectomy, the influence of, in NZB mice (Holmes and Burnet), 449.

Staphylococcal interference effect, the.
1. Some properties of the interference-producing agent in *Staphylococcus albus* and *Staphylococcus aureus* (Pawlyszyn), 105.
2. Its specificity and relationship to the protection induced by bacterial endotoxins (Pawlyszyn and Gulasekharam), 113.

Tacrine and amiphenazole, the actions of, on acetylcholine metabolism in the guinea pig ileum (De la Lande and Porter), 149.

Testosterone in biological fluids, the estimation of.
1. Testosterone in plasma (Hudson, Coghlan, Dulmanis, Wintour and Ekkel), 235.

Testosterone, metabolism of, by semen and the effect of testosterone on oxidative metabolism of spermatozoa (Scott, Baggett and White), 363.

Thymus grafts, the autonomous behaviour of normal (Metcalf), 437.

Toxoplasmosis in New South Wales. A serological survey (Jennis), 187.

Tumour initiation by urethane in mice, the localisation of the influence of croton oil stimulation on (Pound), 73.

Urocanic and formiminoglutamic acid excretion (Davis and Kelly), 499.

Vascular permeability in rat skin, an electron microscopic study of leucocytic emigration and (Hurley), 171.

Vasopressin, the effect of, on water and electrolyte excretion by the sheep (Cross, Thornton and Tweddell), 629.

Virus, avirulent, apparently related to Friend virus, detection of an (Pope), 349.

Virus infections in Queensland, studies of arthropod-borne.
3. Isolation and characterization of virus strains from wild-caught mosquitoes in North Queensland (Doherty, Carley, Mackerras and Marks), 17.

Virus, Murray Valley encephalitis, a plaque assay method for (Austin), 205.

Virus of rabbit papilloma, studies on the.
1. Methods of assay (White, Huebner, Rowe and Traub), 41.

Vitamin B_{12} and pantothenic acid in the liver of sheep (Dawbarn, Forsyth and Kilpatrick), 1.

Ward, Dr. Hugh, personal recollections of (Enders), 381.

Yeasts, preservation of, by drying (Annear), 575.
